

# Cybersource Gateway + Fraud Management Essentials

Protect your business from fraud and accept payments with one platform.

Choose the payment platform with industry-leading fraud screening so you can accept more good orders and reduce fraud attacks. Leverage the scale, security, and analytics of Visa and Cybersource's robust data insights and machine learning risk models to securely accept payments worldwide.

Reduce chargeback and declined authorization costs by detecting card testing and other common fraud attacks.

1 Your customer clicks on a payment option and confirms the transaction.

3 Fraud Management Essentials automatically screens for fraud using advanced artificial intelligence, machine learning, and any rules you have set up based on your risk tolerance.

5 You can easily evaluate transactions pending review through a user-friendly real-time dashboard.

2 The transaction information is sent to Cybersource's payment gateway.

4 The rules tell Fraud Management Essentials whether to accept or reject the transaction or hold it for review.

6 You can monitor trends and historical data in the dashboard or in reports to fine-tune your fraud detection.

## Benefits

Benefit from Cybersource's machine learning capabilities and VisaNet's data and security on a platform built for your business.

Automatically stop fraudulent transactions with powerful computer models utilizing machine learning and hundreds of validation tests.

Get started quickly with pre-configured rules and settings based on Cybersource's expertise and modify according to your unique business needs.

Focus on accepting good orders and grow your business on the payment platform that grows with you. Easily reconfigure Fraud Management Essentials as your business expands.

Learn about fraud strategy from experts, at your own pace, with our Fraud Training Modules, designed by Cybersource risk analysts.
